THE PROVINCIAL TABLES (GIVING FIGURES BY TALUKS OR DIVISIONS)

I Area and population of taluks or divisions	285
II Population of taluk or division by religion and education	291

TABLE I.

AREA, HOUSES AND POPULATION.

This table shows for each district area, number of towns and villages, number of occupied houses, and total urban and rural population, male and female. The districts are arranged, in this and other tables, in the order of natural divisions.

Similar figures are given for Pudukkóttai, Banganapalle, and Sandúr, three of the five feudatory states attached to Madras Presidency. The Native States of Travancore and Cochin, also attached to that Government, took their own census, and are publishing their own reports. The figures of these two states are therefore not included in this volume.

The areas of districts shown in this Table differ considerably from those shown in the corresponding table for 1901. This is chiefly due to the inter-district transfers referred to in the title page of Table II.

For the purpose of column 3 (number of towns), cantonments have been treated as forming part of the towns within which they are included. Villages are those defined as such for revenue administration. Villages wholly included in towns have been excluded from column 4.

Provincial Tables I and II, at the end of this volume, show for each taluk a few of the main statistics, such as total population, density, percentage variation since 1891, distribution by religion, and the number of literate persons.

TABLE II.

VARIATION IN POPULATION SINCE 1891.

This table compares the population as now ascertained with that of the two previous censuses. The figures for the latter differ considerably from those shown in the old census reports, as, during the decade 1901-1911, district areas were readjusted, with the result that four new districts were formed, and the areas of fourteen others were altered. The effect of these changes on the population of the districts concerned has been calculated, and the figures have been adjusted accordingly. They therefore represent in each case the population at the time of those enumerations found in the area now comprised in the district. It was not found possible to carry these adjustments further back so the figures for censuses prior to 1891 have been omitted.

The 1901 population shown in this table exceeds that shown in the corresponding table for that year by 30,492 (15,016 males and 15,476 females), as the former includes the population of (1) Nugúr taluk (males 10,045 and females 10,173) recently transferred from the Central Provinces to the Górávarn Agency, and (2) Laccadive Islands (males 4,971 and females 5,303), the figures for which were printed separately in 1901, but have now been included in those of Malabar district.

To the population of 1891 has been added the then population of Nugúr taluk, 6,995 males and 6,992 females, the population of the Laccadives was included in the Malabar figures for that census.

TABLE III.

TOWNS AND VILLAGES CLASSIFIED BY POPULATION.

In this table, as in tables I and IV, cantonments have been treated as forming part of the towns in which they are situated

Before towns and villages were grouped in the proper class, the floating population enumerated therein, (in encampments, boats, trains, etc), was excluded from the total population shown in the volumes of Village Statistics This floating population for each district is shown in the last column of the table

TABLE IV.

TOWNS CLASSIFIED BY POPULATION WITH VARIATION SINCE 1871.

This table shows the population of towns at each of the last five enumerations, and distribution by sex at the last three

For the purposes of census, a 'town' includes every municipality, every cantonment, and every other continuous collection of houses inhabited by not less than 5,000 persons, which is of an urban character though not under municipal Government. This numerical test was not however strictly applied, and ten places with a population of less than 5,000 persons have been treated as towns

The towns are arranged in this table according to their population in 1911, and have been grouped in six classes —

Class	Limits of population	Number of towns	Classification		
			* Municipality	Cantonment	Others
I	100,000 and over	3	3		
II	50,000 to 100,000	8	8		
III	20,000 to 50,000	40	32		8
IV	10,000 to 20,000	105	13	2	30
V	5,000 to 10,000	113	4	2	107
VI	Under 5,000	11	1		10

* Includes also towns which are both municipality and cantonment.

The forty-six towns which are printed in *italics* were treated as such for the first time in 1911, while only one town (Ganjām) treated as such in 1901 has been omitted from the list. The population of previous censuses against the former represents that of the revenue villages which now make up the town. It has been found impossible to ascertain the population for two towns in 1881, and for five in 1871, in such cases the variation in columns 11 to 13 are left blank

TABLE VII.

AGE, SEX AND CIVIL CONDITION.

This table and that which follows are divided into two parts. Part I begins with a Provincial Summary, wherein statistics for every religion returned are given, and then deals with Districts and States. Part II deals with the twelve towns treated as "Cities."

The details of Districts and States show figures for four religions only—Hindu, Muselman, Christian, and the religion next in importance in the district. Where there is no fourth religion with an appreciable following, figures for all religions, other than the three main religions, are clubbed. In the former case, the total of figures for the several religions will not agree with the figures for "All religions" printed at the top of each district, in the latter case, they will. In part II details are not given by religions.

In the Provincial Summary, details are given for each year up to five years of age, thereafter ages are grouped by quinquennial periods up to 70, and the remainder shown as "70 and over." In Part I (Districts and States) and in Part II, age periods are given in less detail than in the provincial summary.

The ages of the people returned represent the actual numbers of years completed, not the current years of age.

TABLE VIII.

EDUCATION BY RELIGION AND AGE.

This table deals with the literacy of the population classified by religions and age periods.

In general arrangement this table closely follows Table VII. But only four age periods are shown, viz., 0-10, 10-15, 15-20, 20 and over.

Under the orders of the Local Government statistics of literacy in particular vernaculars (compiled in 1901) have been omitted. The literates shown in columns 6 to 8 include literates in English appearing in columns 12 to 14.

The following statement compiled under the special orders of the Census Commissioner shows the Race and Sect of the Christian literates —

Race	Sect	Literates		Literate in English	
		Males	Females	Males	Females
	Total Christian	134,557	64,930	42,283	23,124

TABLE VIII.

EDUCATION BY RELIGION AND AGE.
PART II.—CITIES.

TABLE IX.

EDUCATION BY CASTE, TRIBE OR RACE.

This table was prepared in 1901 only for a few castes in certain selected localities. This time it gives details by caste, tribe or race for (1) the literates, and (2) the literates in English, throughout the Presidency.

The castes, tribes or races have been arranged in the table according to religion, and Hindu and Animistic castes have been further classified by linguistic divisions. Within each group the castes, etc., follow one another in the order of strength.

Castes which have returned no literates are clubbed together and shown as 'others' in their respective divisions.

TABLE XI.

BIRTH-PLACE.

PART I.—DISTRICTS AND STATES.

This table deals with the birth-places of the population enumerated in this Presidency. It is divided into two parts: Part I containing the statistics for the Province as a whole and for each district and state comprised in it, while Part II gives similar information for the 12 towns treated at the census as "Cities".

The various places of birth have been classified and arranged in accordance with the principles followed by the Census Commissioner in the India Tables. In Part I, sections A-II, and B to F, birth-places returned by small numbers of persons have been clubbed together under 'others' in their respective heads. Details of these are given below—

TABLE XII.

INFIRMITIES. PART I.—DISTRIBUTION BY AGE.

PART II.—DISTRIBUTION BY DISTRICTS AND STATES.

The infirmities recorded at the census were insanity, deaf-mutism, blindness and leprosy

The table is divided into two parts—Part I shows the distribution of the persons afflicted according to age, and Part II their distribution according to locality

Some persons were returned as suffering from more than one infirmity In the table they have been shown under each This explains why the total "Population afflicted" in columns 2, 3 and 4 does not quite agree with the total of the figures for each separate infirmity The following is a list of these cases —

	Total	Males	Females.
Total	379	228	151
Insane, blind and leper	1	1	
Insane and deaf mute	175	99	76
Insane and blind	36	19	17

INFIRMITIES BY
DISTRICTS AND STATES

TABLE XII-A.

INFIRMITIES BY SELECTED CASTES TRIBES AND RACES.

In 1901 this table, though an optional one, was prepared for *all* castes in the Presidency. It has now been restricted to 27 castes representing 44 per cent of the Hindu and Animistic population, and to the entire Musalman and Anglo-Indian and Indian Christian communities.

Persons suffering from more than one infirmity (see title page of Table XII) have been counted separately for each infirmity.

TABLE XII A

Infirmities by selected castes, tribes and races.

TABLE XIII.

PART I.—CASTE, TRIBE, RACE OR NATIONALITY.

This table is divided into two parts. Part I shows in alphabetical order every caste, tribe or race returned in the Presidency, and the total number of males and females belonging to each.

Part II, in which Hindu castes are further arranged by linguistic divisions, shows the districts in which the principal castes, tribes or race are chiefly found. Figures are given here only for those contributing more than one per mille to the Presidency population, and under each such caste, tribe or race, a district is shown only when it contributes more than one per mille to the district population.

The principles followed in 1901 (see caste glossary appended to Chapter VIII of the report on that census) in the clubbing of castes were followed also on the present occasion, with the following exceptions:—

(1) *Kálingi* and *Kalinyi*, two separate castes, were clubbed together in 1901. The figures for them have now been separated.

(2) The following castes, which were not treated as distinct castes in 1901, have now been treated as main castes:—

Alayan.	Haroboleya	Ramban
Avittan	Kachi.	Sakan
Belasáhi	Parel	Samban
Daman	Pattel	Tudia
Gherva	Punjábi	Váram

TABLE XV-A.

OCCUPATION.

PART I.—PROVINCIAL SUMMARY.

This table is divided into three sections—Section A, a general table of occupations, Section B, Subsidiary occupations of agriculturists, Section E, Statistics of Industries

XV-A—General table of occupations—This is complete in itself and deals with the whole population of the Presidency. It has been prepared in two sections—

- (1) A provincial summary giving the totals for British territory, Feudatory States, and Cities,
 - (2) A detailed table giving the statistics for each district, state and city
- Figures of cities are also included in the district and provincial totals

TABLE XV-E.

STATISTICS OF INDUSTRIES. PART I.—PROVINCIAL SUMMARY.

Tables XV-A and XV-B prepared from the general schedules give only the main functional distribution of the people, distinguishing workers from dependents. The Government of India prescribed in addition a special industrial schedule, to be filled in by the owners and managers of factories, mills, etc., in which at least twenty persons were employed on the 10th March 1911.

The statistics so collected are exhibited in the following table. It is divided into four parts. Part I gives information regarding each kind of factory, etc., distinguishing between those factories in which mechanical power is employed, and those in which it is not, and classifies them according to the number of persons employed. In Part II, district figures are given without these details. Parts III and IV are designed to show the caste and nationality of owners and managers respectively.

In Part I the following abbreviations are used —

Column 1 —A Factories, mines, etc., in which mechanical power is used

B Factories, mines, etc., in which mechanical power is *not* used

Column 18 —The figures in brackets represent the “state of business” on the date of census as noted below —

- (1) Much brisker than usual
- (2) Brisker than usual
- (3) Somewhat brisker than usual
- (4) Normal
- (5) Somewhat slacker than usual
- (6) Slacker than usual
- (7) Much slacker than usual

TABLE XVI.

OCCUPATION BY SELECTED CASTES, TRIBES OR RACES.

This table shows the various occupations followed by certain selected castes, tribes and races, in certain selected localities. In the corresponding table of 1901, occupations, detailed in column 13 onwards of this table, were given by 'orders' (now called sub classes). On the present occasion some of the sub-classes are subdivided, so as to bring out more clearly the character of the occupations followed by members of the selected castes.

The figures in column 13 onwards are exclusive of those in columns 7 and 8. Asterisks have been placed against the figures in those columns which are affected by this arrangement.

The population dealt with in this table includes only those who have returned the name of the main caste, and not of sub-castes subsequently clubbed together in table XIII. But exceptions were made in the case of the Bahja, Dóvanga, Kammálan, Kamsala and Shánán castes for which see title page to table XIV.

TERRITORIAL DISTRIBUTION OF THE CHRISTIAN
POPULATION BY SECT AND RACE.

This table shows the sects of Christians of all races

Fifteen Armenians by race have returned other churches than Armonian, viz Church of England (5), Roman Catholic (6), Greek Church (1), Lutheran (1), Protestant unspecified (2) These have been clubbed with Europeans in this table but in table XVIII they have been shown separately

This table includes, for convenience, certain persons holding beliefs which, in the strict sense of the word, can hardly be described as "Christian" Particulars by race and sex are as follows —

	Total	Males	Females	Race		
				European	Anglo-Indian	Indian
TOTAL	168	111	57	101	6	61
Unitarian	70	43	27	10		60

TABLE XVIII.

EUROPEANS, ARMENIANS AND ANGLO-INDIANS BY AGE.

PART I.—DISTRICTS AND STATES.

This table is divided into two parts—one for districts and states and the other for cities

The number of "Armenians" shown in this table refers to those who have returned themselves as such by race

Under the orders of the Government of India the term "Anglo-Indian" has been substituted for "Eurasian" used in 1901

THE PROVINCIAL TABLES.

TABLE I.

AREA AND POPULATION OF TALUKS AND DIVISIONS.

At the Census of 1901 a separate volume of Provincial tables, containing detailed statistics for taluks and divisions, was published. On the present occasion such information has been condensed and is exhibited in the two following tables.

2 The populations of taluks and divisions at previous censuses have been adjusted for changes of area during the decades.
